

8 impacts identified on 8 environmental areas

<p>1. *Sustainable use and protection of water and marine resources (previously water consumption)</p>	<p>2. Use of energy</p>	<p>3. Use of raw materials (in particular, scarce natural resources)</p>	<p>4. Use of chemicals</p>	<p>5. Use of ozone depleting substances or Persistent Organic Pollutants</p>
<p>6. *Transition to a circular economy (previously handling and transportation of dangerous substances)</p>	<p>7. Soil and groundwater emissions (Previously emissions to surface and groundwater)</p>	<p>8. Surface water emissions (previously emissions into soil)</p>	<p>9. *Climate change mitigation (previously air emissions)</p>	<p>10. Noise emissions and light emissions</p>
<p>11. Odour and dust emissions</p>	<p>12. *Pollution prevention and control (previously dust emissions)</p>	<p>13. *Protection and restoration of biodiversity and ecosystems</p>	<p>14. Animal welfare</p>	<p>15. Wastewater management</p>
<p>16. Solid waste management</p>	<p>17. Handling, transportation and waste management of hazardous substances (previously Waste Management of Hazardous Substances)</p>	<p>18. Food waste management</p>	<p>19. *Climate change adaptation (previously New Environmentally Friendly Technologies)</p>	<p>20. Use and diffusion of environmentally friendly technologies (Previously diffusion of environmentally friendly technologies)</p>
